Thinking Reality...Committed To Success

HMIS On Cloud

SaaS

Software as a Service

This model is pertinent to small size clinics who aspire to go for automation without investing in costly hardware for servers, networking, full **HMIS** application and IT resource. Clinics are required to pay an easy monthly instalment (EMI) to get IT enabled as per DHA requirement effectively.

UTILIZE THE POWER OF INTERNET FOR e-CLAIMS

“Micropro established in 1988 is one of the oldest software companies in Central India. Although its nerve centre is in Nagpur, but due to the quality services it offers, Micropro is operating in varied parts of the world. The advanced “Hospital Management System” developed by Micropro in apt for both small clinics as well as big hospitals. Micropro has successfully implemented **e-Claim and e-Prescription** in a number of clinics and hospitals in UAE.

e-Claim

Dubai Health Post Office (DHPO) is designed to serve as a communication hub for electronic health claim transactions within the Dubai area. The system is enabled to support multiple electronic claiming transactions providers, payers, authorities and patients.

HopsyCare is customized as per the DHA requirement for e-Claim generation & submission through the regular module of Insurance. This will remove all human interventions and possible issues arising out of it. The patient will naturally get faster claims in turn.
